[Climate change](#)

United Nations • Climate change refers to long-term shifts in temperatures and weather patterns. Human activities have been the main driver of climate change, primarily due to the burning of fossil fuels like coal, oil and gas.

This is why Hurricane Helene caused so much rain and flooding in North Carolina and Tennessee and etc... All that moisture should've fallen on Florida but it was suspended in the atmosphere and fell where it could further north. The latest hurricane in the Gulf of Mexico was blasted and again the moisture remains suspended and carried out over the Atlantic Ocean. And now there is a H U G E high pressure system off the east coast.
